Railroad Motorway Building to be Demolished

PRESS RELEASE

July 8, 2019

GLENWOOD SPRINGS, CO – Contractors will begin demolition of the Railroad Motorway building west of City Hall on July 11.

All steel and metal paneling that can be recycled will be recycled, however the “Freight Offices Railroad Motorway” and “Rio Grande” signs will be salvaged by the contractor and retained by the City.

During the 45-day project, a portion of the parking lot will be closed to the public.

The railroad building, which has been used for city storage, was damaged due to a water leak this winter. The removal of the structure will allow for future redevelopment of the site.
