PRESS RELEASE

August 23, 2019

Transmission poles replacement to cause power outages in No Name

GLENWOOD SPRINGS, CO – Xcel Energy will be replacing transmission poles in the No Name area during the week of August 26. The Glenwood Electric powerline serving No Name is attached to some of the poles that will be replaced. In the interest of workers' safety, Glenwood Electric will be scheduling power outages on all of No Name so work can be completed safely and efficiently.

Residents on the north side of I-70 can expect outages of up to 8 hours on days the new power poles are placed. Outage hours will be from 8 a.m. to 4 p.m.

On the south side of I-70, Glenwood Electric will hook up a generator to serve critical loads such as Glenwood Canyon Resort sewer lift station and No Name water. There will be short outages, up to an hour, during the connecting and disconnecting of the generator. While we will do our best to serve as many customers as possible off the generator, some residents on the south side of I-70 may see the longer outages from 8 a.m. to 4 p.m.

Xcel's work is scheduled to take place sometime next week, August 26-29. Work is not expected to occur on Friday, August 30 due to the Labor Day weekend. The work may also take place on a few days after the holiday but is to be determined.
